

SOTO-USA

The reliable and consistent source of SOT® seminars

- DESIGN YOUR OWN SOT SEMINAR –

We at SOTO-USA are dedicated to allowing **you** to explore **your** own potential and determine **your** specific needs to create technical excellence in **your** practice. Besides presenting our usual series of seminars (visit our website at: www.soto-usa.org) we are offering a completely unique opportunity for chiropractors and chiropractic students who are truly interested in obtaining the clinical skills necessary to compete in today's healthcare environment.

We receive many requests to present Sacro Occipital Technique® SOT seminars throughout the US and abroad. While we would love to come to everyone individually that is not feasible. To attempt to make SOT and our seminar team more available we have instituted a special program we call "Design Your Own Seminar". If you can get 10 DC's or 20 students together in your area we will come to you and teach any one of the SOT courses we offer. For more information about this program and available seminars check out our website www.soto-usa.org or contact Dr. Klingensmith at 336-793-6524, sotousa@skybest.com.

What does SOTO-USA have to offer?

- SOTO-USA is dedicated to teaching the most accurate, comprehensive, practical application of SOT available.
- All-new illustrated DeJarnette –accurate manuals will be available for purchase at each seminar.
- Our certified instructors have 100's of years of clinical experience between them.
- All our seminars are professionally presented with accurate powerpoint presentations that follow workbooks supplied to seminar participants.
- We offer an extensive support system for SOT practitioners, including, manuals, forums, clinical symposiums, equipment and research.

IF YOU want to expand your cash practice, increase referrals, get more consistent results, help more people with less stress on you and them, practice more effectively and efficiently, be sought after by colleagues and patients, deliver state of the art technical expertise and be constantly excited about your practice, learn SOT and SOT Cranial now!

**Watch your practice grow as you provide state of the art chiropractic care
with less stress on you and your patients!**

How does the process work?

- **First**, decide on the type and content of the seminar that you would like to have.
- **Second**, contact us (see below for contact info) and let us know what seminar you want, the approximate date (we need a 6 week lead way), and the location.
- **Third**, YOU must get together at least 10 DC's or 20 Students that want to attend.
- **Fourth**, make sure all participants are registered 4 weeks prior to the seminar date and have sent their paid registrations to the SOTO-USA Sparta Office.
- CEU credits if applicable will usually be through NYCC.

OUR CURRENT SEMINAR OFFERINGS INCLUDE:

SOT CATEGORIES PART ONE (12 Hours) - In this hands-on seminar you will learn the anatomy and physiology of SOT's 3 Category system. You will also learn the comprehensive evaluation and assessment procedures for assessing and treating a sacroiliac joint instability disorder (category two) with its complex of interrelated factors. In this class also covered is the trapezius fiber analysis and adjusting for the thoracolumbar region, the cervical stairstep adjustment for the cervical spine, and the basic cranial adjustment for category two. No prerequisite.

SOT CATEGORIES PART TWO (12 Hours) - This hands-on seminar will cover all the treatment for lumbosacral disc herniations, piriformis muscle syndrome, and sciatica presentations (category three) and all of the treatments for sacroiliac joint fixation, pelvic torsion, and altered sacral nutation (category one). In this class we will cover occipital fiber analysis and treatment for thoracolumbar regions and cranial techniques for category three and one, rehabilitation techniques, and transitioning between categories. No prerequisite

SOT CHIROPRACTIC MANIPULATIVE REFLEX TECHNIQUE (CMRT) (12 hours) - CMRT is a hands-on soft tissue technique that deals with the viscerosomatic reflex arc. It has a specific set of indicators – occipital fibers – that assist the practitioner in isolating the most dominant viscerosomatic/somatovisceral spinal reflex imbalance and, once that reflex is neutralized, specialized organ reflexes are applied to facilitate balance and function. No prerequisite.

SOT EXTREMITY TECHNIQUE (8 hours) - SOT and Zindler Extremity Techniques integrates with the Category System when persistent extremity involvement inhibits the proper resolution of the category. This seminar covers diagnosis and treatment of primary and secondary extremity dysfunction using SOT indicators. The SOT Extremity Distortion Pattern focuses on the feet, ankles, knees, hips, shoulders, elbows, and atlas/axis. No prerequisite.

SOT CRANIAL TECHNIQUE – Level 1: Cranial Basics (8 hours) - Cranial anatomy and physiology, cranial bone ranges of motion, Sphenobasilar corrections, CSF physiology, flow, balancing and palpation. Basic procedures to enhance Category 1, 2 and 3 corrections, evaluation and palpation exercises to be integrated into practice immediately. No prerequisite.

SOT CRANIAL TECHNIQUE – Level 2: Sutural & TMJ Protocols (12 hours) - Classic DeJarnette Sutural Technique, how to treat difficult sacroiliac conditions cranially, complete TMJ protocols, how to work with dentists in your SOT cranial practice. No prerequisite.

SOT CRANIAL TECHNIQUE – Level 3: SOT Cranial Specifics (12 hours) - Integrating condition-specific procedures into the SOT cranial practice. Advanced procedures to be used in conjunction with SOT category work and basic cranial procedures to address more complex patterns. Techniques for blood pressure, asthma, sinus congestion, headaches and ear problems are some topics included. No prerequisite.

SOT CRANIAL TECHNIQUE – Level 4: SOT Cranial Intra-Orals (8 hours) - How to use advanced intra-oral adjusting procedures to diagnose and treat frontal, temporal and occipital lesions. This course is open only to those who have successfully completed SOT Category work and Cranial Basics.
